PROFILE

As a second-year undergraduate student pursuing a Bachelor of Technology in Computer Science and Engineering , I am passionate about expanding my knowledge and skills in the field of technology. I have successfully completed studies in Data Structure and Algorithms in Java Language, where I honed my problem-solving abilities through guided learning experiences. Furthermore, I have had the privilege of enhancing my expertise in Web Development with the MERN stack. This invaluable experience has equipped me with the skills necessary to proficiently build dynamic and modern web applications.

WORK EXPERIENCE

Self Placed

- Dedicated significant time to independent coding practice on platforms such as LeetCode, successfully mastering over 75 Data Structures and Algorithms (DSA) questions.
- Acquired advanced skills in Java programming language through consistent participation in coding exercises and challenges.
- Actively tackled diverse coding problems across various platforms, refining problem-solving techniques and deepening understanding of algorithms.
- Engaged with online coding communities and forums to actively exchange knowledge, seek guidance, and contribute to discussions on coding techniques.
- Maintained a comprehensive record of completed Data Structures and Algorithms questions on my GitHub repository, showcasing my progress and achievements.
- Demonstrated competence in real-world problem-solving by participating in coding competitions and applying acquired skills in competitive settings.

Project

Smart India Hackathon (SIH) Project: Career Counseling Chatbot

- Contributed to the development of an AI-based career counseling chatbot for secondary level students during the Smart India Hackathon (SIH) as a content writer and graphic designer.
- Generated compelling content and crafted visually engaging graphics to enhance the user experience of the chatbot interface.
- Collaborated closely with the development team to ensure content alignment with the chatbot's functionalities and user requirements.
- Leveraged graphic design expertise to create intuitive user interfaces and visually appealing assets for the chatbot.
- Played an integral role in refining the chatbot's content and design elements to effectively address the needs of secondary level students.
